Dear California Building Standards Commission:

Upon further review, DSA has determined the proposed change to Title 24, Part 1, California Code of Administrative Code, Article 10 Inspector Certification, Section 4-363.3(a) violates the Health and Safety Code Subsection 18930(a)(6). Specifically, it is vague in its description of the information DSA must receive as part of the certification request. The language should be revised so as to not cite the specific form number, but rather, describe the form information generally.

Thank you.

Ryan Huxley, SE

Supervising Structural Engineer – Field Program » Codes and Standards Unit

Division of the State Architect
