Good afternoon,

I am writing to express my strong support for the proposed amendments to Item 5, Section 7-115 of the California Administrative Code. These changes are crucial as they grant the authority for a licensed professional with detailed and extensive knowledge of fire life safety systems to review and stamp construction documents for submittal. Allowing licensed professionals to undertake this responsibility will ensure that competent individuals with day-to-day experience and familiarity with standards and code requirements oversee crucial design and decision-making processes. This will undoubtedly enhance the quality and safety of our building projects, ensuring that they meet the highest standards of fire life safety.

Thank you for considering my perspective on this matter,

Zachary Schuler P.E.
