---

Hello Kevin and Mitchel,

On behalf of the California Energy Commission, I am writing to express our support for the amendments made to the electric vehicle (EV) charging sections of the 2025 California Building Standards Code. These updates will help advance the adoption of EVs by providing Californians with greater access to EV charging infrastructure.

We look forward to our cooperation in future cycles as we continue to incorporate the most recent updates to the statewide assessment of electric vehicle charging infrastructure, any relevant electric load forecasts, and the statewide transportation electrification goals and standards.

Thank you for your dedication and hard work.

**Danny Leung (he, him, his)**
