Executive Director Stoyan Bumbalov,

We are living during a time of dramatic Climate Change. As a people, we need to change our daily routines and habits to reduce GHGs as soon as possible. Please consider all the overwhelming scientific data. It's may not be a perfect solution; however, we need as many people and families using EVs rather than fossil fuel burning vehicles. This measure is a step in the right direction. Thank you for listening. Please take action.
